International Waste Recovery and Valuation Exhibition

www.caci.dz

In light of the continuous increase in waste volumes generated in Algeria, sustainable waste management and waste recovery have become major strategic priorities. Algeria currently generates nearly 34 million tons of waste annually, including household, industrial, and agricultural waste. Recoverable organic materials account for approximately 50% of the total volume. According to projections from the Ministry of Environment and Quality of Life, this figure could reach between 70 and 75 million tons by 2035, highlighting the urgent need to develop innovative and sustainable solutions in the fields of recycling and the circular economy.

As part of ongoing efforts to promote the circular economy and encourage waste recovery solutions, the 10th edition of the International Exhibition for Waste Recovery and Recycling "REVADE" will take place from October 6 to 8, 2026, at the Palais des Expositions (SAFEX) in Algiers, Pavilion "S". The event is organized by the Algerian Chamber of Commerce and Industry (CACI), in partnership with the National Waste Agency (AND) and Algeria Exhibitions, and will serve as a key platform bringing together professionals and stakeholders involved in waste collection, sorting, transportation, treatment, and recovery.

The exhibition aims to showcase technological innovations, foster national and international partnerships, and encourage the transfer of expertise and know-how in a rapidly expanding sector. Algeria's recycling market is currently estimated at over 40 billion Algerian dinars and contributes to the creation of thousands of direct and indirect jobs, underlining the growing economic and social significance of the sector.

REVADE also serves as a privileged platform for networking and exchange, bringing together public and private institutions, technology solution providers, local authorities, researchers, project developers, and investors.

By participating in REVADE 2026, exhibitors will have the opportunity to showcase their expertise, present their equipment, products, and innovative solutions, and strengthen their visibility in a promising market with strong growth potential.

REVADE

EVENTS

OBJECTIFS

REVADE exhibition sets as a main objective to:

Promote new types of equipments and the technologies used in the field of transformation and recycling wastes.

Promote the waste recovery and recycling industry and encourage investment and new the creation of new companies.

Promote and develop the management and the recovery of wastes.

COMPANIES/ACTIVITIES ADMITTED TO THE EXHIBITION ARE

Suppliers of waste collection and transportation equipment

Processing and recycling

Selective sorting

Technical landfills

Recycled Raw Materials

incrimination centers

Incineration plants

Suppliers of waste processing and recycling equipment

Management of sorting and landfill centers

Public institutions and organizations

Financial institutions

Waste management studies and consulting

Training institutes

Key figures of the REVADE exhibition

132

NUMBER OF EXHIBITORS

The REVADE exhibition welcomed 132 exhibitors representing various sectors of activity, from technology to ecological solutions.

10

DISCUSSION PANELS

There were 10 discussion panels bringing together experts, decision-makers, and industry representatives to exchange on the challenges and opportunities of the energy transition.

500

PARTICIPANTS

Around 500 participants attended the different conferences and panels, including industry professionals, researchers, and students.

15 000

VISITORS

The REVADE exhibition welcomed a total of 15,000 visitors in 2024, marking a 20% increase compared to the previous year.

96 %

The overall satisfaction rate of exhibitors at the REVADE exhibition reached 96%, which demonstrates excellent feedback. This satisfaction is mainly due to the efficient organization and the established quality of contacts.

90 %

Visitors expressed a 90% satisfaction rate regarding all activities and exhibitions presented at the REVADE exhibition.

CONFERENCE AND PANEL

The 10th edition of the professional exhibition will feature a comprehensive program of conferences and panel discussions led by experts and specialists from the recycling and waste recovery sector.

These sessions will provide a platform for discussion and exchange on the challenges and development prospects of the industry, as well as on the opportunities it offers to businesses and economic stakeholders.

The discussions will notably address topics related to sustainability, environmental initiatives, and energy efficiency improvement, contributing to the promotion of responsible practices and sustainable development.

MEDIAS PLAN

For the 2026 edition of the international exhibition REVADE, an enhanced communication strategy will be implemented to ensure wide visibility and strong outreach among the various target audiences.

This strategy will rely on a coordinated promotional campaign combining digital, visual, and audiovisual media, in partnership with media outlets and communication stakeholders.

The dissemination of advertising posters, promotional spots, and informational content across major communication channels will support the effective promotion of the exhibition and strengthen its national and international visibility.
